AWS Cloud Developer and Solutions Architect | Full-Stack Software Engineer | .NET Core & Node.js | Angular & MEAN Stack | Serverless, Event-Driven Architecture & Scalable Solutions

Summary

AWS Certified Solutions Architect and Cloud Developer with extensive experience spanning 20+ years in software engineering, cloud architecture, and enterprise application modernization. Over the past decade, I have specialized in designing and implementing scalable, cost-efficient, and secure cloud solutions using AWS, VSTS/Azure, and Heroku. Proven track record of leading the development of a SaaS platform serving 220+ housing authorities, 100K+ units, processing \$38M+ in annual transactions with 99.99% up-time, while reducing operational costs by 35%. Expertise in Serverless architectures, event-driven systems, and Infrastructure as Code (IaC) tools like CloudFormation, CDK, and AWS SAM. Adept at mentoring team members, collaborating with stakeholders, and driving innovation through AI-powered development tools. Passionate about delivering cloud-native solutions that align with business goals and enhance operational efficiency.

Core Technical Expertise

- **Back-End Development:** .NET Core, C# .NET, Entity Framework, Node.js, RESTful APIs, GraphQL, Python
- **Front-End Development:** Angular (up to 17), TypeScript, JavaScript, AngularJS, HTML, CSS, SPA, MEAN Stack
- **AWS Cloud Architecture:** Fargate, Lambda, S3, CloudFormation, CDK, AWS SAM, API Gateway, RESTful APIs, GraphQL APIs, SQS, SNS, RDS, DynamoDB, ECS, ECR, EventBridge, CloudWatch, IAM, Route53, CloudFront
- **DevOps & CI/CD:** GitLab CI/CD, Bitbucket CI/CD, Docker, Automated Testing (Unit, Integration, Performance)
- **Databases:** MS SQL Server (20+ yrs), MongoDB (10+ yrs), PostgreSQL, MySQL/MariaDB, DynamoDB
- **Testing & Tools:** Postman, Swagger, NUnit, xUnit, TDD, X-Ray/OTEL

Experience

Owner / Senior Software Engineer / Solutions Architect

Bonefish Software & Consulting, LLC

2017 - PRESENT

Golden, Colorado

- Custom Software Development
- AWS Cloud Architecture and Engineering

Lead Software Engineer

Kanso Software

2017 - 3/2026

Denver, Colorado

SaaS next-gen Housing Platform

- Architected and scaled SaaS platform serving 220+ housing authorities, processing \$38M+ in annual transactions, 100K+ units, with 99.99% up-time, while reducing operational costs by over 35%
- Designed and built a scalable SaaS platform using web technologies (MEAN stack: AngularJS/Angular, TypeScript/JavaScript, Node.js, MongoDB), AWS Serverless and EDA (event-driven architectures), and a robust C# .NET Lambda-based API. Leverage AWS services including SQS, SNS, Lambda, EventBridge, API Gateway, Route 53, RDS (SQL Server, PostgreSQL), DynamoDB, ECS, Fargate, EC2, CloudFront, S3 as well as CloudFormation, CDK, AWS SAM, Infrastructure as Code (IaC) practices and multiple third-party integrations to ensure reliability, scalability, and seamless deployment.
- Leveraged AI tools such as AWS Kiro, Windsurf Agentic AI IDE, JetBrains Rider + Agentic AI, and DataGrip + Windsurf AI, ollama, AWS Bedrock, Bedrock Knowledge Bases, Bedrock Guardrails, Anthropic Claude Code, CodeEx, ChatGPT, etc. for agentic AI code generation, testing, documentation, etc.
- Played an integral role in application modernization, feature design, implementation, delivery, maintenance, migrations, deployments, and proof of concepts (POCs).
- Managed and mentored team members on both monolithic and cloud platforms.
- Collaborated with the Product Owner, DataOps, QA, business stakeholders, and other relevant parties to align development with business goals.
- Led architectural design discussions and code reviews for a team of 6+ engineers, establishing coding standards, design patterns, and best practices that reduced defect rates and improved code maintainability
- Mentored junior and mid-level developers on .NET Core microservices architecture, AWS Serverless patterns, and Angular component-based development, resulting in improved team delivery
- Collaborated cross-functionally with UX designer, product owner, and QA team using Agile/Scrum methodologies to deliver 50+ customer-facing features, ensuring brand consistency and optimal user experience
- Championed DevOps practices by implementing CI/CD pipelines using GitLab CI/CD, BitBucket CI/CD, AWS services, bash, CloudFormation, AWS SAM, reducing deployment time by 60% and enabling daily production releases with automated testing (unit, integration, and performance tests)

Senior Software Engineer, Project Lead

The Regis Company

2012 - 2017

Golden, Colorado

SaaS next-gen Learning Simulations

- Developed highly customized and complex business simulations designed to deliver impactful learning experiences. These simulations were used by high-level senior managers and C-Suite executives, often resulting in transformative "a-ha" moments. Some simulations were team-based, involving 40-50 teams competing in real-time under high-pressure scenarios with intricate scoring models.
- Served as Team Lead on multiple projects, collaborating with prestigious clients, including several Fortune 500 companies such as EY, Deloitte, Accenture, Abbott, and Northwestern Mutual, as well as other notable organizations like INPO.
- Technologies used included C#.NET, ASP.NET, IIS, SQL Server, T-SQL, JavaScript, CSS, HTML, MVVM, SPA, System Dynamics Models (iThink), XML, Jenkins, VSTS (Azure DevOps) CI/CD, Azure, Subversion, git, and GitLab.

Development Lead / Senior .NET Developer (CDS, E-commerce)*GoDaddy**2010 - 2012**Denver, CO***Internet Domain Registrar and Web Hosting**

- Reduced deployment times from 8+ hours to 10 minutes by developing a Content Delivery System (CDS) and its management UI (CDSM). This solution also included an archival system to preserve historical content and pricing snapshots for legal compliance.
- Developed and maintained landing pages for GoDaddy.com's front-of-site sales platform using technologies like Visual Studio, C# .NET, HTML, CSS, JavaScript, jQuery, AJAX, XML, JSON, SQL Server, and MongoDB.
- Built a RESTful Content Delivery Service (CDS) to deliver JSON content dynamically, enabling faster and more efficient content updates, reducing deployment times from 8+ hours to 10 minutes.
- Created a custom CMS to dynamically load content into UI widgets based on JSON definitions, streamlining content management processes.
- Completed large-scale multi-currency conversion projects for GoDaddy.com and My Account applications, ensuring accurate pricing and seamless global user experiences.
- Redesigned central navigation for GoDaddy's front-of-site platforms (GoDaddy.com, My Account, Cart, and Videos), improving usability and customer engagement.

Senior Software Engineer / DBA / Project Manager*HydraForce, Inc.**2005 - 2010**Remote*

- Software development, support, and maintenance of internal and external facing applications including custom manufacturing software, Fourth Shift ERP integration, Intranet, Supplier Extranet, Customer Extranet, B2B integration projects with customers and vendors, and many other internal software development projects.
- Additional responsibilities include SQL Server database development, maintenance and administration, source code revision control administration (Subversion), ERP maintenance, and other general IT administration tasks.

Senior Software Engineer (MRP/ERP & E-commerce)*Softbrands, Inc. (an Infor company)**1996 - 2005**Golden, Colorado*

- Designed and developed Lean Automation software for the manufacturing industry, streamlining production processes and improving operational efficiency using Windows Forms, Microsoft Visual C# .NET, Microsoft SQL Server, SSRS, WinForms, and Infragistics NetAdvantage Suite.
- Optimized data management and reporting by designing and implementing SQL database structures, including tables, stored procedures, views, and user-defined functions (UDFs), enabling faster and more accurate decision-making.
- Developed a scalable e-commerce system leveraging .NET Web Services (ASMX), C#, ASP.NET, and SQL Server, which integrated seamlessly with legacy ERP systems, credit card processing systems, third-party shipping providers, and custom pricing modules to drive sales and operational efficiency.
- Delivered end-to-end solutions for the e-commerce system, including development, testing, documentation, implementation, customer support, and ongoing maintenance, ensuring reliable performance and customer satisfaction.
- Built web-based extranet systems (Supplier Center and Customer Center) using ASP.NET, C#, Visual Basic, SQL Server, and Microsoft Access to improve supply chain collaboration and customer engagement by integrating with the Fourth Shift ERP System.

Education

AWS Cloud Institute (ACI)

03/2026 (expected)

Certified Cloud Developer

- Designed and implemented scalable, high-availability architectures using AWS services such as EC2, RDS, DynamoDB, S3, IAM, SQS, SNS, and CloudFront to optimize performance and reliability.
- Built and secured network architectures with VPCs, subnets, route tables, NACLs, and security groups, ensuring compliance with security best practices.
- Automated cloud infrastructure and application deployments using CI/CD pipelines (AWS CodePipeline, CodeBuild, and CodeDeploy) and GitHub Actions to improve efficiency, consistency, and release management.
- Developed Serverless applications with React, API Gateway, AWS Lambda, and DynamoDB, optimizing cost efficiency and scalability.
- Container computing with Docker, ECR, ECS, EC2, Fargate, EKS (Elastic Kubernetes Service)
- Developed numerous applications with Python, Django, AWS SDK for Python (Boto3)
- Gained hands-on experience through 100+ interactive AWS labs and two capstone projects, applying cloud architecture and DevOps best practices in real-world scenarios.
- Developed cloud applications utilizing AWS Bedrock, Bedrock Knowledge Bases (RAG), Rekognition, Comprehend, Translate, Transcribe, and Polly, enabling AI-driven automation, predictive analytics, and advanced natural language processing features.

University of Louisiana

Bachelor of Science in Industrial Technology

Certifications

- **AWS Certified Solution Architect Associate (SAA)** (Amazon Web Services) *Obtained: 2023*
- **AWS Certified Cloud Practitioner (CCP)** (Amazon Web Services) *Obtained: 2021*
- **AWS Partner: Accreditation (Technical)** (Amazon Web Services) *Obtained: 2024*
- **LFEL1000: Introduction to FDC3** (The Linux Foundation) *Obtained: 2025*
- **Certified ScrumMaster** *Obtained: 2015*
- **Microsoft Certified Application Developer: Microsoft .NET** (Microsoft) *Obtained: 2007*
- **Microsoft Certified Professional (MCP)** (Microsoft) *Obtained: 2005*
